Corrosion, Inspection & Chemicals Team

To Whom It May Concern;

GW & ASSOCCIATES was contracted to supply and install Retrowrap on **BPTT's IMMORTELLE** and **MAHOGANY A** Platform Risers in 3rd Qtr 2007 at very short notice. Risers on Both Platforms experienced external damage on Neoprene Wraps at Splash Zone level, Inciting Corrosion Activity. Visual confirmation with anomalies was captured in our Annual Routine Inspections. Repairs had to be planned, schedule and executed within shortest period because of favorable sea level conditions experienced during late 3rd qtr months.

GW & ASSOCCIATES successfully installed Retrowrap on Risers as per Scope of Works within project time frame and budget.

Throughout the project **GW & ASSOCCIATES** acted in a professional, compliant manner and operated at all times within stipulated policies and operating procedures. Project was completed without incident or injuries to Personnel and the Environment.

BPTT was very satisfied with the quality of work carried out by this Contractor.

BPTT sincerely thank **GW & Associates** for assisting us with our project deliverables and **HIGHLY RECOMMEND** their valuable services to any Corporate Organization.

Sincerely,

.....
